

# DEC 9-10, 2018

## SENMoCOR™

### LOWER QUARTER

**Location: Reclaim Physical Therapy, 1144 Willagillespie Rd., Suite 1, Eugene, OR 97401**

#### **Sensorimotor Control and Rehabilitation (SenMoCOR™) of the Lower Quarter**

~ 3 + Hours of online learning and 2 days Live Course

Describe the application of sensorimotor control & learning principles to lower quarter rehabilitation. Apply knowledge of pathology to specific decisions regarding sensorimotor control of the lower quarter. Present an evidence-based, comprehensive and systematic model of sensorimotor control to the management of patients with lower quarter pain, dysfunction and/or functional performance deficits. Explain the structure and function of key neuromuscular components involved in lower quarter control and performance. Demonstrate functional evaluation tools that are aimed at identifying functional deficits and measuring relevant sensorimotor functions found in patients suffering from painful lower quarter conditions. Execute specific locomotor and somatosensory fundamental exercise strategies that serve as a foundation for recovery. Implement corrective movement strategies that correspond with functional examination findings. Connect cognitive and biopsychosocial factors to the prescription of a sensorimotor control program in patients suffering from lower quarter pain, dysfunction and/or functional performance deficits.

**Don't Miss Out!  
This is the only  
SenMoCOR™  
Course Held in  
2018**
